Plant, Cell and Environment (1991) **14**

Contents

PART 1

1 How do plant growth substances work? II: Opinion
A. Trewavas
13 Respiration in a future, higher-CO_2 world: opinion
J. S. Amthor
21 Short and long-term effects of a change in the spatial distribution of nitrate in the root zone on N uptake, growth and root development of young lettuce plants
I. G. Burns
35 Effects of over-winter fumigation with sulphur and nitrogen dioxides on biochemical parameters and spring growth in red spruce (*Picea rubens* Sarg.)
J. Wolfenden, M. Pearson & J. B. Francis
47 Sugarcane proteins and messenger RNAs regulated by salt in suspension cells
S. Ramagopal & J. B. Carr
57 Photocontrol of stem elongation in plant neighbourhoods: effects of photon fluence rate under natural conditions of radiation
C. L. Ballaré, A. L. Scopel & R. A. Sanchez
67 The influence of water deficits on mRNA levels in tomato
T.-Y. Ho & M. L. Mishkind
77 What limits nitrate uptake in soil?
D. Robinson, D. J. Linehan & S. Caul
87 Quantitative determination of water sorption by plant cuticles
A. Chamel, M. Pineri & M. Escoubes
97 Chilling and oxygen metabolizing enzymes in *Zea Mays* and *Zea diploperennis*
L. S. Jahnke, M. R. Hull & S. P. Long
105 Low night temperatures have a differential effect on the diurnal cycling of gene expression in cold-sensitive and tolerant tomatoes
C. Eduardo Vallejos
113 Higher plants express 3-deoxy-*D-manno*-octulosonate 8-phosphate synthase
R. L. Doong, S. Ahmad & R. A. Jensen
121 Maize stomatal conductance in the field: its relationship with soil and water potentials, mechanical constraints and ABA concentration in the xylem sap
F. Tardieu, N. Katerji, O. Bethenod, J. Zhang & W. J. Davies
127 Do stomata respond to humidity?
P. J. Aphalo & P. G. Jarvis
133 Simulated influence of altitude on photosynthetic uptake potential in plants: short communication
W. K. Smith & R. A. Donahue
137 Book reviews

PART 2

139 Long-term functioning of enucleate sieve elements: possible mechanisms of damage avoidance and damage repair
J. A. Raven
147 Studies of *Elodea nuttallii* grown under photorespiratory conditions. I. Photosynthetic characteristics
L. S. Jahnke, T. T. Eighmy & W. R. Fagerberg
157 Studies of *Elodea nuttallii* grown under photorespiratory conditions. II. Evidence for bicarbonate active transport
T. T. Eighmy, L. S. Jahnke & W. R. Fagerberg
167 Studies of *Elodea nuttallii* grown under photorespiratory conditions. III. Quantitative cytological characteristics
W. R. Fagerberg, T. T. Eighmy & L. S. Jahnke
175 Experiments on the control capacity of stomata of *Picea abies* (L.) Karst. after fumigation with ozone and in environmentally damaged material
U. Maier-Maercker & W. Koch
185 Abrasive damage by wind to the needle surfaces of *Picea sitchensis* (Bong.) Carr. and *Pinus sylvestris* L.
P. R. van Gardingen, J. Grace & C. E. Jeffree
195 Oleosomes (lipid bodies) in nitrogen-fixing peanut nodules
S. Jayaram & A. K. Bal
205 Adaptation to shade of the light-harvesting apparatus in *Silene dioica*
M. McKiernan & N. R. Baker
213 Solute concentrations of the phloem and parenchyma cells present in squash callus
V. K. Lackney & R. D. Sjolund
221 A temperature-sensitive nodulation mutant (*sym*-5) of *Pisum sativum* L.
J. C. Fearn & T. A. LaRue
229 Role of root systems of eastern larch and white spruce in response to flooding
C. F. Reece & S. J. Riha
235 Oxygen uptake by roots of *Rumex* species at different temperatures: the relative importance of diffusive resistance and enzymatic kinetics
P. Laan, M. Tosserams, P. Huys & H. F. Bienfait
241 Level of endogenous indole-3-acetic acid in the stem of *Pinus sylvestris* in relation to the seasonal variation of cambial activity
B. Sundberg, C. H. A. Little, K. Cui & G. Sandberg
247 Book reviews

PART 3

251 Leaf age and season influence the relationships between leaf nitrogen, leaf mass per area and photosynthesis in maple and oak trees
P. B. Reich, M. B. Walters & D. S. Ellsworth
261 *Dunaliella acidophila:* an algae with a positive zeta potential at its optimal pH for growth
H. Gimmler, M. Schieder, M. Kowalski, U. Zimmermann & U. Pick
271 Influence of long photoperiods on plant development and expression of Crassulacean acid metabolism in *Mesembryanthemum crystallinum*
S.-H. Cheng & G. E. Edwards
279 Mediation of tropisms by lateral translocation of endogenous indole-3-acetic acid in maize coleoptiles
M. Iino
287 The effects of nitrogen, light and water availability on tropic leaf movements in soybean (*Glycine max*)
W.-Y. Kao & I. N. Forseth
295 Effect of nitrogen nutrition on photosynthesis and growth in C_4 *Panicum* species
W. D. Bowman
303 Quantitative changes in cytoplasmic microsomal proteins associated with aluminium toxicity in two cultivars of winter wheat
J. D. Ownby & W. R. Hruschka
311 Nitrogen metabolism and the level of Crassulacean acid metabolism in *Kalanchoë lateritia* Engl.
I. Santos & R. Salema
319 Ion accumulation in the cell walls of rice plants growing under saline conditions: evidence for the Oertli hypothesis
T. J. Flowers, M. A. Hajibagheri & A. R. Yeo
327 Polyamine levels in relation to growth and NaCl concentration in normal and habituated sugarbeet callus cultures
F. Le Dily, J.-P. Billard & J. Boucaud
333 High carbon dioxide and sun/shade effects on isoprene emission from oak and aspen tree leaves
T. D. Sharkey, F. Loreto & C. F. Delwiche
339 Modification of paraheliotropic leaf movement in *Phaseolus vulgaris* by photon flux density
Q. A. Fu & J. R. Ehleringer
345 Recovery of photosynthesis in winter-stressed Scots pine
C. Ottander & G. Öquist
351 CO_2 enrichment of sour orange trees: 2.5 years into a long-term experiment: short communication
S. B. Idso, B. A. Kimball & S. G. Allen
355 Book reviews

PART 4

357 The refilling of embolized xylem in *Pinus sylvestris* L.
M. Borghetti, W. R. N. Edwards, J. Grace, P. G. Jarvis & A. Raschi
371 The active uptake of carbon dioxide by the unicellular green algae *Chlorella saccharophila* and *C. elipsoidea*
C. Rotatore & B. Colman
377 The acquisition and accumulation of inorganic carbon by the unicellular green algae *Chlorella ellipsoidea*
C. Rotatore & B. Colman
383 Fusicoccin-induced membrane depolarization, K^+ efflux and extracellular alkalinization in leaves of *Vigna unguiculata*
C. I. Ullrich, S. Pike, F. I. Beleid El-Moshaty, S. Lenz, P. Popham & A. J. Novacky
391 The perturbation of the endomembrane network of the chlamydomonad alga *Gloeomonas* by the herbicide isopropyl N-phenyl carbamate (IPC)
D. S. Domozych
399 Zinc-induced vacuolation in root meristematic cells of *Festuca rubra* L.
K. L. Davies, M. S. Davies & D. Francis
407 Diel water movement between parenchyma and chlorenchyma of two desert CAM plants under dry and wet conditions
D. T. Tissue, D. Yakir & P. S. Nobel
415 Effect of changes in nitrogen nutrition on the polyamine content of *Alnus glutinosa*
G. S. Tonin, C. T. Wheeler & A. Crozier
423 Self-incompatibility in *Papaver rhoeas*: there is no evidence for the involvement of stigmatic ribonuclease activity
V. E. Franklin-Tong, K. K. Atwal, E. C. Howell, M. J. Lawrence & F. C. H. Franklin
431 Surface potentials and hydraulic signals in wheat leaves following localized wounding by heat
M. Malone & B. Stanković
437 Distribution of aluminium in accumulator plants by X-ray microanalysis in *Richeria grandis* Vahl leaves from a cloud forest in Venezuela: short communication
G. Cuenca, R. Herrera & T. Mérida
443 Changes in water relations and endogenous abscisic acid content of wheat and barley grains and embryos during development: short communication
P. C. Morris, P. C. Jewer & D. J. Bowles
447 Book reviews

PART 5

449 Does climatic warming increase the risk of frost damage in northern trees? Theoretical paper
H. Hänninen
455 The kinetics of stomatal responses to VPD in *Vicia faba:* electrophysiological and water

relations models
S. M. Assmann & A. Gershenson

467 Intercellular location of glycoprotein in soybean nodules: effect of altered rhizosphere oxygen concentration
E. K. James, J. I. Sprent, F. R. Minchin & N. J. Brewin

477 Iron-catalysed oxygen radical formation and its possible contribution to drought damage in nine native grasses and three cereals
A. H. Price & G. A. F. Hendry

485 Mobility and deposition of silicon in cucumber plants
A. L. Samuels, A. D. M. Glass, D. L. Ehret & J. G. Menzies

493 Chlorophyll and light gradients in sun and shade leaves of *Spinacia oleracea*
M. Cui, T. C. Vogelmann & W. K. Smith

501 Induction of extreme light sensitivity in buried weed seeds and its role in the perception of soil cultivations
A. L. Scopel, C. L. Ballaré & R. A. Sánchez

509 Stomatal responses to humidity in air and helox
K. A. Mott & D. F. Parkhurst

517 Studies of the relationship between isoprene emission rate and CO_2 or photon-flux density using a real-time isoprene analyser
R. K. Monson, A. J. Hills, P. R. Zimmerman & R. R. Fall

525 Measurement of intracellular and extracellular free calcium in apple fruit cells using calcium-selective microelectrodes
F. R. Harker & M. A. Venis

PART 6

531 A model of water flow through plants incorporating shoot/root 'message' control of stomatal conductance
I. R. Johnson, J. J. Melkonian, J. H. M. Thornley & S. J. Riha

545 Epidermal conductance in different parts of durum wheat grown under Mediterranean conditions: the role of epicuticular waxes and stomata
J. L. Araus, A. Febrero & P. Vendrell

559 Ion currents and the nitrogen status of roots of *Hordeum vulgare* and non-nodulated *Trifolium repens*
A. L. Miller, G. N. Smith, J. A. Raven & N. A. R. Gow

569 Low temperature acclimation of guard cell chloroplasts by the arctic plant *Saxifraga cernua* L.
B. T. Mawson & W. R. Cummins

577 Acclimation of rice to changing atmospheric carbon dioxide concentration
A. J. Rowland-Bamford, J. T. Baker, L. H. Allen Jr, & G. Bowes

585 The use of tree root suckers to estimate root water potential
T. Simonneau & R. Habib

593 PATCHY: simulating and visualizing the effects of stomatal patchiness on photosynthetic CO_2 exchange studies
J. M. Cheeseman

601 Abscisic-acid-deficient mutants at the *aba* gene locus of *Arabidopsis thaliana* are impaired in the epoxidation of zeaxanthin
S. C. Duckham, R. S. T. Linforth & I. B. Taylor

607 Stomatal control of xylem embolism
H. G. Jones & R. A. Sutherland

613 Glutamate dehydrogenase regulation in callus cultures of *Nicotiana plumbaginifolia:* effect of glucose feeding and carbon source starvation on the isoenzymatic pattern
E. Maestri, F. M. Restivo, M. Gulli & F. Tassi

619 Gravitropic response of primary maize rootlets as influenced by light and temperature: short communication
B. A. Horwitz & B. Zur

PART 7

625 Structure-activity relationships of biologically active oligosaccharides: commissioned review
S. Aldington, G. J. McDougal & S. C. Fry

637 Environmental productivity indices and productivity for *Opuntia ficus-indica* under current and elevated CO_2 levels: commissioned review
P. S. Nobel

647 Growth and photosynthesis of soybean (*Glycine max* (L.) Merr.) in simulated vegetation shade: influence of the ratio of red to far-red radiation
R. C. Pausch, S. J. Britz & C. L. Mulchi

657 A calcium influx precedes organogenesis in *Graptopetalum*
J. M. Hush, R. L. Overall & I. A. Newman

667 Atmospheric CO_2, plant nitrogen status and the susceptibility of plants to an acute increase in temperature
J. S. Coleman, L. Rochefort, F. A. Bazzaz & F. I. Woodward

675 Evaluation of the pressure chamber method for the assessment of water status in chilled plants
A. Pardossi, P. Vernieri & F. Tognoni

683 Stomatal response to blue light: water use efficiency in sugarcane and soybean
D. A. Grantz & S. M. Assmann

691 Division of guard cell protoplasts of *Nicoctina glauca* (Graham) in liquid cultures
W. Cupples, J. Lee & G. Tallman

699 Effect of growth temperature on biomass production of nearly isonuclear triazine-resistant and -susceptible common groundsel (*Senecio vulgaris* L.)
W. B. McCloskey & J. S. Holt

707 Reduction of leaf photosynthesis and transpiration rates of potato plants by second-stage juveniles of *Gobodera pallida*
J. Schans

713 Interactions of Cd with Zn, Cu, Mn and Fe for lettuce (*Lactuca sativa*) in hydroponic culture
C. Thys, P. Vanthomme, E. Schrevens & M. De Proft

719 Measurement of chlorophyll fluorescence within leaves using a fibreoptic microprobe: technical report
J. F. Bornman, T. C. Vogelman & G. Martin

727 Book reviews

PART 8

729 Modification of the response of photosynthetic productivity to rising temperature by atmospheric CO_2 concentrations: Has its importance been underestimated? Opinion
S. P. Long

741 Rising CO_2 levels and their potential significance for carbon flow in photosynthetic cells: commissioned review
M. Stitt

763 Potential effects of elevated CO_2 and changes in temperature on tropical plants: commissioned review
K. P. Hogan, A. P. Smith & L. H. Ziska

779 Physiology of inorganic C aquisition and implications for resource use efficiency by marine phytoplankton: relation to increased CO_2 and temperature: commissioned review
J. A. Raven

795 Growth at elevated CO_2: photosynthetic responses mediated through Rubisco: commissioned review
G. Bowes

807 The effects of increasing CO_2 on crop photosynthesis and productivity: a review of field studies: commissioned review
D. W. Lawlor & R. A. C. Mitchell

819 The effects of increased atmospheric carbon dioxide and temperature on carbon partitioning, source-sink relations and respiration: commissioned review
J. F. Farrar & M. L. Williams

831 Molecular responses of plants to an increased incidence of heat shock: commissioned review
C. J. Howarth

843 The interaction of rising CO_2 and temperatures with water use efficiency: commissioned review
D. Eamus

853 Canopy photosynthesis of crops and native plant communities exposed to long-term elevated CO_2: commissioned review
B. G. Drake & P. W. Leadley

861 The molecular and biochemical analyses of CO_2-concentrating mechanisms in cyanobacteria and microalgae: commissioned review
J. R. Coleman

869 Effects of source-sink relations on photosynthetic acclimation to elevated CO_2
W. J. Arp

877 Book reviews

PART 9

881 A dynamic model of photosynthesis in varying light taking account of stomatal conductance, C_3-cycle intermediates, photorespiration and Rubisco activation
L. J. Gross, M. U. Kischbaum & R. W. Pearcy

895 Use of a model of photosynthesis and leaf microenvironment to predict optimal stomatal conductance and leaf nitrogen partitioning
A. D. Friend

907 Induction of exocytosis in characean internodal cells by locally restricted application of chlorotetracycline and the effect of cytochalasin B, depolarizing and hyperpolarizing agents
I. Foissner

917 Growth-induced water potentials may mobilize internal water for growth
R. Matyssek, S. Maruyama & J. S. Boyer

925 Plants can grow on internal water
R. Matyssek, A.-C. Tang & J. S. Boyer

931 *Avena fatua* L. seed and seedling nutrient dynamics as influenced by mycorrhizal infection of the maternal generation
X. Lu & T. Koide

939 Comparison of the effect of rapidly and gradually developing water-stress on carbohydrate metabolism in spinach leaves
R. Zrenner & M. Stitt

947 Photosynthetic productivity of an immature maize crop: changes in quantum yield of CO_2 assimilation, conversion efficiency and thylakoid proteins
C. M. Stirling, G. Y. Nie, C. Aguilera, A. Nugawela, S. P. Long & N. R. Baker

955 Fuctional interaction between leaf trichomes, leaf wettability and the optical properties of water droplets
C. A. Brewer, W. K. Smith & T. C. Vogelmann

963 Responses of photosynthesis and carbohydrate-partitioning to limitations in nitrogen and water availability in field-grown sunflower
A. L. Fredeen, J. A. Gamon & C. B. Field

971 Responses of stomata of senescing and non-senescing leaves of *Nicotiana glauca* to changes in intercellular concentrations of leaf carbon dioxide
C. Thomas, S. D. Davis & G. Tallman

979 Do leaves contribute to the abscisic acid present in the xylem of 'droughted' sunflower plants
T. F. Neales & A. L. McLeod

987 An experimental test of the eddy correlation technique over a Mediterranean macchia canopy
R. Valentini, G. E. Scarascia Mugnozza, P. de Angelis & R. Bimbi

995 The polarity of gravitropism in the moss *Physcomitrella patens* is reversed during mitosis and after growth on a clinostat
C. D. Knight & D. J. Cove

1003 Increased photosynthetic capacity of *Scirpus olneyi* after 4 years of exposure to elevated CO_2
W. J. Arp & B. G. Drake

1007 Terrestrial carbon storage resulting from CO_2 and nitrogen fertilization in temperate grasslands: short communication
J. H. M. Thornley, D. Fowler & M. G. R. Cannell

1013 Instructions to contributors.
